# Connecting To Wifi On Your Personal Android Device

THE NEW NETWORK IS CALLED **byodscdsb**

After completing these steps and successfully connecting to this WiFi network, you shouldn't have to reconnect every day; your device will automatically connect to WiFi.

# byodscdsb

- 1 Select **Settings**, then **Wi-Fi**
- 2 Select **Add WiFi Network**
- 3 Type **byodscdsb** in the Network SSID field. Choose 802.1x EAP for Security,
- 4 For Identity type in your SCDSB
- 5 Network username. And enter your Network Password in the Enter Password field.
- 6 Choose Connect. It will take a little while to connect.
